

## Embracing Hope

### Super Specialized New Born Care Unit - NICU Level 2

Neonatal Intensive Care Unit (NICU), a place of extraordinary care and hope for our tiniest patients and their families.

#### What is Neonatal Intensive Care Unit (NICU)?

Our NICU is a haven of specialized care for newborns that need extra support due to premature birth, low birth weight, congenital conditions, or other health challenges. Here, every baby receives individualized attention and the highest level of medical expertise.

#### State-of-the-Art Facilities

Equipped with state-of-the-art technology and monitoring systems, our NICU combines medical innovation with a gentle touch. From advanced ventilators to specialized incubators, we provide the latest tools to support each baby's unique needs and promote their healthy development.

#### NICU Level-1

- Provide a basic level of care to neonates who are at low risk.
- Provide neonatal resuscitation at every delivery.
- Evaluate and provide postnatal care to stable term newborn infants.
- Stabilize and provide care for infants born >35 weeks gestation who remain physiologically stable.
- Stabilize newborn infants who are high risk, establish at the site consultative agreement for timely and safe referral and transport process.

#### NICU Level-2

- Provide care for infants born  $\geq 32$  week's gestation and weighing  $\geq 1500$ g who have physiological immaturity or who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis.

- Provide care for infants convalescing after intensive care.
- Provide mechanical ventilation for brief duration less than 24 hours, CPAP or both.
- Stabilise infants born before 32 weeks and weighing less than 1500g until transfer to NICU.
- Establish at the site consultative agreement for timely and safe referral and transport process for all high risk neonates at level 3 facility.

#### Family-Centered Care

We understand the importance of family involvement in a baby's care journey. That's why we provide comprehensive support and resources to help parents navigate their NICU experience with confidence and peace of mind.

#### Celebrating Milestones

Every milestone in the NICU is a cause for celebration. From the first cuddle to reaching developmental milestones, we cherish each moment and support families every step of the way.

#### Our NICU Care Team

Our dedicated team of neonatologists, nurses, lactation consultants, and support staff is here to support you every step of the way. We understand the challenges you may face and are committed to providing compassionate care and guidance throughout the NICU journey.

## News

### RAK Hospital pioneers advanced prostatic treatments

Introduces the breakthrough minimally invasive procedure, offering significant benefits over traditional methods

KhaleejTimes, June 12

RAK Hospital now offers an extensive array of prostatic treatments, highlighted by the advanced UroLift procedure for prostate enlargement. UroLift is a minimally invasive solution for benign prostatic hyperplasia (BPH), alleviating symptoms such as urinary frequency and weak stream without the need for surgery, thus enhancing quality of life for aging men. The hospital has strengthened its urological services with the addition of renowned specialists Dr. Keshavamurthy Mohan and Dr. Karthik Rao, positioning itself as a leader in urological care in the MENA region. This expansion includes innovative treatments like Bipolar TURP, Laser Prostatectomy, and REZUM, benefiting both local communities and international patients. Emphasizing personalized care and advanced treatment options, RAK Hospital aims to attract medical tourists seeking superior urological care.

### 'Our hearts are full': Eid Al Adha babies bring joy to families across the UAE

The National, June 16

Akthar Saleem and Seerin Sitara celebrated Eid with the birth of their baby girl at 1:27 am at Aster Hospital, Al Qusais, expressing gratitude to Allah for this blessed gift. Meanwhile, Indian couple Mumtaz Evp Abdulrihman Koroth and Mumtaz Erayath Vadake Purayil welcomed their third child, a baby boy weighing 3kg, born at 12:48 am in Ras Al Khaimah. Dr. Raza Siddiqui, executive director of RAK Hospital, emphasized the significance of this joyous occasion, marking sacrifice, faith, and unity, made even more special with the arrival of these precious children.
